

*Dear Reader!*

We would like to present to you a new issue of our Electronic Journal.

Here you may find papers devoted to fundamental economic theory, the theory of competition and antimonopoly regulation, economics of public sector and social sphere including factors of tourism industry development.

If we take into account difficult economic situation, we'll realize that it is particularly important to develop ways to improve the tools of competition policy and antimonopoly regulation, which are reflected in two articles of the issue.

The first article examines some theoretical and practical approaches to the analysis of unfair competition as one of the factors of rights' violation in the sphere of intellectual property. In the second article the author is searching a balanced approach in making decisions related to the transactions of economic concentration in the sectors involved in foreign trade.

Also we continue the tradition of publishing of young scientist's research. In this issue you may find studies of master students of the Faculty of Economics led by Professor Alexander Khudokormov (Head of the Department of National Economics History and Economic Studies, Faculty of Economics, Moscow State Lomonosv University) dedicated to the life and scientific work of Nobel Prize winners on economics in the XXI century: Daniel Kahneman (2002), Robert Aumann (2005), Christopher Pissarides (2010), Eugene Fama (2013), Robert Shiller (2013).

We are glad to cooperate and looking forward to your publications.

Editor-in-Chief

The President of the Faculty of Economics

Lomonosov Moscow State University

Professor Vasilij Kolesov
